

Changes to be made

TASK 1

AIZA MARYAM

Co-Founder · Architect & Interior Designer

SAAD SULAIMAN

Co-Founder · Architect & Interior Designer

Write Architectural and Interior Designer
instead of architect and interior designer

TASK 2

1

- Page title and meta description (in your site's SEO settings)
- Page title, 60 characters max

**Aureon Studio | Extensions, Planning & Interior Design
London**

- Meta description, 155 characters max:

**London architectural and interior design studio in London.
Measured surveys, house extensions, loft conversions and
planning applications. Fixed fees.**

2.

Stats block ("0+ Projects", "0% Happy Clients")

Replace it with numbers.

3. "Award-winning" anywhere else

Search every page, the footer and social bios for "award" and remove it. Because it says award wining but 0 awards

4. Journal posts dated 2024

re-date each post to published it in 2026

5. Project status labels For each project, add one line: "Our role: concept design, planning drawings and 3D visualization."

New service pages

Add these four pages under Services, and rename the existing "Architecture" page to "Architectural Design". Every page uses the same layout: headline, intro, what's included, timeline, price, and one button.

Page 1: Measured Surveys

URL: /services/measured-surveys

Headline: Laser measured surveys across London

Intro: Every good design starts with accurate drawings of what is already there. We survey your property with laser measuring equipment and produce clear, accurate drawings in CAD or Revit, ready for design, planning or Building Regulations.

What's included

- Floor plans of every level, with room sizes and ceiling heights
- Elevations and sections where needed
- Doors, windows, chimney breasts, steps and level changes
- Drawings in PDF, DWG (AutoCAD) or Revit

Timeline: site visit within 5 working days of booking, drawings within 5 working days of the visit.

Price: from £600 for a flat or terrace up to 100 m². Larger homes and commercial spaces quoted on request.

Button: Book a survey

Page 2: House Extensions & Loft Conversions

URL: /services/extensions-and-lofts

Headline: Extensions and loft conversions,
designed and approved

Intro: We design rear, side return, wraparound
and two-storey extensions, and loft conversions,
for London homes. We take you from the first visit
to approved drawings, with fixed fees for each
stage.

How it works

1.Visit and survey. We meet you at home, talk
through your ideas and measure the property.

2.Design options. We prepare two or three layout
options with 3D views so you can see the space.

3.Planning or permitted development. We check
what your project needs and prepare the
drawings.

4.Building Regulations. We produce the technical
drawings your builder and building control need.

Price: design and planning drawings from £1,500,
plus the council's application fee.

Button: Discuss your extension

Page 3: Planning Applications

URL: /services/planning-applications

Headline: Planning applications handled for you

Intro: Planning can feel confusing. We check your council's rules, prepare every drawing and document the council asks for, submit the application through the Planning Portal, and deal with the planning officer until a decision is made.

What's included

- Advice on whether you need full planning permission, permitted development or a Lawful Development Certificate
- Location and block plans
- Existing and proposed plans, elevations and sections
- Design and Access Statement where required
- Submission and follow-up with the council

Timeline: most householder applications are decided within 8 weeks of the council validating them.

Price: from £1,500 for a householder application, plus the council's fee. A measured survey is needed first if you don't have one.

Button: Start your application

Page 4: Building Regulations Drawings

URL: /services/building-regulations

Headline: Building Regulations drawings your builder can price and build from

Intro: After planning, your project needs technical drawings that show how it will be built safely and meet current regulations. We prepare a clear drawing package and coordinate with your structural engineer.

What's included

- Construction plans, sections and details
- Specification notes covering structure, insulation, fire safety, ventilation and drainage
- Coordination with your structural engineer's calculations
- Submission to building control (local council or approved inspector)

Price: from £1,200 for a typical extension, or £2,450 together with the survey and planning drawings.

Button: Get a quote

For Architects & Studios page

This is the page every outreach email links to. Add it to the main menu as "For Studios". URL: /for-studios

Headline: Extra capacity for busy London studios

Intro: When your team is stretched, we take on the surveys and drawing production so you can stay focused on design and clients. We work on your title block, to your standards, and we never approach your clients.

What we can take on

- Measured surveys:** laser measured plans, elevations and sections in CAD or Revit, back within 5 working days of the site visit.
- Planning drawing packages:** existing and proposed plans, elevations, sections, location and block plans, ready for you to review and submit.
- Building Regulations drawings:** technical packages for residential extensions and lofts.
- Interior production:** joinery and kitchen drawings, lighting layouts, FF&E schedules.
- 3D visualization:** interior and exterior visuals for client presentations.

How we work with you

- 1.Send us the brief.** A site address, sketch or marked-up drawing is enough to start.
- 2.Fixed quote within 24 hours.** One price per job, or a day rate for ongoing support.
- 3.Your title block, your standards.** Send your CAD template and layer standards and we follow them.
- 4.Confidential.** A simple non-disclosure and non-solicitation agreement comes as standard.

Service	From
Measured survey, flat or terrace up to 100 m²	£350
Measured survey, house 100–200 m²	£500
Planning drawing set, rear or side extension	£750
Building Regulations drawings, extension	£800

TASK 5

Homepage

- Hero subheading:** change "Calm, considered spaces for modern living" to "Extensions, planning and interiors for London homes, designed by an architectural and interior design studio in London." Keep "Spaces Crafted for Life" as the headline.
- Hero buttons:** "Book a survey" (main) and "View our work" (secondary).
- Services row:** show Measured Surveys, Extensions & Lofts, Planning Applications, Interior Design, each linking to its page.
- Studio band,** just above the footer: "Architect or interior designer? We provide surveys and drawing support for busy studios." with a "For Studios" button.
- Footer:** add "Aureon Studio Ltd, registered in England and Wales, company no. **17365238**".
